Discover Adventures with Urban Wildlife during *Walk in the Woods*

THE WOODLANDS, TEXAS (March 27, 2017) – Whether it’s raptors, armadillo, deer or alligators, Texas Game Wardens respond to everything from poaching and game violations to weather emergencies, missing persons and water safety. *Walk in the Woods* Nature Lecture presents *Coexisting with Wildlife* with Hendrik Volschenk, game warden for Texas Parks & Wildlife Department, Thursday, April 6, 2017, 7:30 p.m., at McCullough Junior High School, 3800 S. Panther Creek Drive.

A native of South Africa, Mr. Volschenk served with anti-poaching units for the South African National Parks system before becoming a Texas Game Warden. Whether advocating for elephants and rhinos or armadillos and alligators, Mr. Volschenk has a passion for sharing his experiences and insights about living in harmony with wildlife. “I have dealt with this issue on two continents. It’s an ongoing relationship, and like all relationships, it needs work and a lot of understanding,” he says.

A free program of The Woodlands Township, the lecture series receives support from The Woodlands G.R.E.E.N., Waste Management and Nature’s Way Resources. For more information, please call The Woodlands Township Environmental Services at 281-210-3800, or visit www.thewoodlandstowship-tx.gov/wildlife.

Hendrik Volschenk, game warden for Texas Parks & Wildlife Department, shares his adventures with wildlife on two continents (North America and Africa) during the next Walk in the Woods Nature Lecture, Thursday, April 6, 2017, 7:30 p.m., at McCullough Junior High School, 3800 S. Panther Creek Drive.
